

Supplementary Results: Controlled Distillation of Speculative LLM Venture Concepts

Anonymous author(s) for review

Reading guide

This supplement reports the full aggregated metric tables behind the main manuscript. It excludes private mappings and candidate-level unblinding data. The Gemini 3.1 Flash Lite P1 study is primary. Gemini 2.5 Flash Lite P0 and P1 are retained as supporting developmental studies and are not pooled with the primary study. Negative M3–M1 deltas favor M3 only for risk metrics; for all other individual metrics, positive deltas favor M3.

S1. Primary-study individual-card metrics

Table 1: Gemini 3.1 Flash Lite P1: all individual-card paired statistics ($n = 60$ pairs per evaluator).

Judge	Metric	n	M1	M3	Δ	95% CI for Δ	M3>M1	M1>M3	p_{Holm}
ChatGPT Plus 5.5 Web	Novelty	60	2.850	2.783	-0.067	[-0.167, 0.033]	3	7	1.000

S8. Descriptive all-condition tables and exploratory M0 contrasts

M0 is not matched at the idea level to M1/M3. The following tables are provided for completeness only. They are descriptive or exploratory, and are not used as confirmatory evidence in the manuscript.

Table 14: Gemini 3.1 Flash Lite P1: descriptive M0/M1/M3 method-metric means.
